

**Responses to the following questions regarding transmission service over Phase I/II HVDC-TF have been requested. Our responses are in red text below each question.**

1. What will be the maximum duration for firm service that is going to be possible to acquire?  
**See Section 2.1(a)(i) of Schedule 20A**
2. In the case of oversubscription, will Customers with a reservation for shorter term service or equal duration service and lower price have the right of first refusal to match any longer term request or equal duration service with a higher price before losing its reservation priority?  
**See Section 2.1(b)(iv) of SSP 4/15/08 Order 890 Filing and 10/27/08 FERC Order**
3. We assume that there is going to be a 5 min Submittal Window during which all of the requests submitted are going to be considered submitted simultaneously. Is that correct?  
**See Section 2.1(b)(vi) of SSP 4/15/08 Order 890 Filing and 10/27/08 FERC Order**

If there is a certain number of MW left that cannot be divided on a whole basis to customers that have submitted simultaneously requests, how will those MW be allocated: to the first customers who submitted the first request during the 5 min window or the last?

**See 5/7/08 FERC Order and Section 2.1(b)(vi) of 6/6/08 SSP Compliance Filing**

4. Are the bids submitted during the 5 minute Submittal Window going to be masked?  
**See SSP 8/25/08 FERC Filed Compliance Statement**

If so, how is the service provider going to allow a customer to exercise its right of first refusal in case of an oversubscription of the line?

**See Section 2.1(b)(iv) of SSP 4/15/08 Order 890 Filing and 10/27/08 FERC Order**

5. Also we would like to know if our service agreement and our application are in accordance with the Schedule 20A or if we have to update them.

**All applications and Service Agreements for Phase I/II HVDC-TF Service should be reviewed by each Phase I/II HVDC-TC Customer for the type of service and service end dates that they are planning to request.**

6. Could you please give me the date at which your agreement with the Phase-II Asset Owners Terminates?

**The Term is as defined in the Support Agreements. As set forth in UI's 1990 FERC Form 1, support payments began with the November 1, 1990 commercial operation of the Phase II facilities.**

My reading is that a transmission customer could place a reservation up to the end of such agreement. Is it right?

**See Section 2.1(a)(i) of Schedule 20A**
