

*The United Illuminating Company*

*Fuel Cell Demand Exemption Rider FCDE*

**Availability:**

This Rider is available to any customer who installs a fuel cell to meet all or part of their load requirements and takes service in accordance with General Service Time-of-Use Rate GST or Large Power Time-of-Use Rate LPT. In order to comply with Section 118 of Public Act 07-242, any demand charges incurred for the operation of a fuel cell in which loss of power is due to an interruption of distribution service or fuel cell unit shutdown occurring in the off-peak hours will be reviewed on a case by case basis, and billing adjustments will be made as appropriate.

The Company will rely on information and communications from the customer describing and supporting a claim for waiver of a demand charge, and on meter and other technical data associated with both the fuel cell and the Company's distribution service location in order to qualify and quantify a charge amount to be waived. The charge waived will not exceed the amount resulting from the problem or shutdown.
