The United Illuminating Company

Distributed Generating Facility Net Energy Rider NE

Applies throughout the Company's Service Area.

Availability:

This rider is available to any Distributed Generating Facility on the Customer’s Premises with installed nameplate capacity of 500 kilowatts or less if fueled by a Non Class I renewable energy resource, or 50 kilowatts or less if a Fossil Fuel is used.

Metering:

Customers electing service under this rider in conjunction with a demand-metered supplemental service rate shall be metered by two meters, one meter to measure supplemental service sold to the Customer and one meter to measure kilowatt hours purchased by the Company. Customers electing service under this rider and a non-demand metered supplemental service rate may be metered by one meter. The appropriate meter provision(s) will be provided by the Customer. The Company may install, at its own cost, time-differentiated meters for load research purposes.

If the installed nameplate capacity is greater than 500 kilowatts if fueled by a non Class I renewable energy resource, or greater than 50 kilowatts if a fossil fuel is used, a Customer may elect service under this rider upon the Customer’s stated intention to limit operation to the 500 kilowatt or 50 kilowatt level as appropriate to the fuel used, provided that the Customer installs an approved metering provision so as to allow the Company to meter generation output. The Customer agrees to provide the Company access to this meter during normal Company business hours.

Rate per Month:

Net Sales to Customer:

The Customer may elect any of the Company’s appropriate supplemental service rates. Kilowatt-hours purchased by the Company shall be deducted from sales to the Customer prior to applying the rate for supplemental service in order to determine the bill for net sales.
C.P.U.C.A. No. 506 continued

**Purchases from Customers:**

Any net output from the Customer’s Generating Facility which exceeds sales to the Customer on a monthly basis will be purchased by the Company under Rate SG2.

The Company will credit all amounts it owes the Customer for purchases under this Rider against any amounts the Customer owes the Company with respect to electric energy. Any excess credit will be paid by the Company to the Customer.

**Minimum Term of Service:**

One year.

**Terms and Conditions:**

The terms and conditions applicable to the Company’s Guidelines for Generator Interconnection and other Company Terms and Conditions, where not inconsistent with any provisions hereof, are part of this rider.

*Effective: November 1, 2008*
