**Complete remaining empty fields to assign responsibility.

***The Utility will request the customer-contractor contract/agreement with the first project application received from each installer annually.

NOTE: A Renewable Energy Certificate (REC) represents the Environmental Attributes associated with one megawatt-hour of renewable energy as defined by Connecticut law. RECs generated by the facilities participating in Residential Renewable Energy Solutions are transferred to the utility company in exchange for the incentive payments made to the facility owner under the program. Therefore, while you cannot claim that you are using the renewable power generated by the facility, your lease of a renewable energy system does support renewable development in Connecticut and increase the amount of solar energy consumed by all electric ratepayers in the State.

Program Fee Notice: All applicants to Residential Renewable Energy Solutions are required to pay a \$____ application fees to support the administrative costs of the program. Additionally, customers will be charged fees if and when they make changes to the payment beneficiary information. You may or may not be responsible for these fees depending on your contract with your Installer.

I, _____, hereby confirm that I have received and understand the above information. I further confirm that I have had a chance to ask questions of my provider and have received sufficient answers, if applicable.
