

Shared Clean Energy Facilities (“SCEF”)

Connecticut Licensed Professional Engineer Certification of Average Annual Production of the Facility

Instructions:

Section 2.4.2 of the SCEF RFP provides conditions upon which Bidder is required to provide a calculation of the average annual production of the Facility as determined by a Connecticut licensed Professional Engineer. This calculation must be consistent with the guidelines provided in Section 2.4.2 of the RFP.

Please ensure that the Professional Engineer certified calculation includes the entire project Site Address, inclusive of street number, street name, city, state, and zip code.
