

School Solar Projects

Starting in Year 4 (2025), additional capacity will be available for eligible solar projects for public school customers. Bids for School Solar projects will be accepted from the opening of the February RFP through the close of the August RFP, or until the available capacity is exhausted, whichever occurs first. Eligible School Solar Projects will be awarded in the order in which they are received until the available capacity is exhausted. A School Solar Project queue will be posted below once available.

School Solar Projects are required to submit a completed Pre-Application Checklist in addition to all other Bid requirements as noted in the NRES RFP. All items on the Checklist must be complete before submitting an NRES School Solar project application.

Tariff Pricing for School Solar Projects will be administratively set on an annual basis and approved by PURA as noted in the applicable RFP.

School Solar Projects seeking a Price Adder must submit a School Solar Price Adder Explanation and Description Form.
