

# English Station: Update on the Demolition of Station B

---

## TIMELINE

End of June through July 2019

## SCOPE AND METHODOLOGY

- Demo will be sequenced using heavy equipment, demolishing the building from West to East
- No implosive devices will be used to demolish Station B.
- All permits and Health and Safety Plans are currently approved and in place

## PRE-DEMO ACTIVITIES

Prior to any demo a licensed abatement contractor will have completed the removal of hazardous building materials within Station B. The work was performed in accordance with an Alternative Work Practices Plan which was approved by the CT Department of Health along with required monitoring Project Monitor oversight for safe work clearances.

# English Station: Update on the Demolition of Station B

---

During the demo of Station B the following engineered controls and mitigation measures will be used:

**Implementation  
of approved  
traffic control plan**

**Continuous  
wetting of  
building surface  
and structure**

**Monitoring  
of regulated  
activities**

**Real-time dust  
monitoring**

**Sequencing  
of demo work**

Once demo of Station B is completed and the area abutting Grand Ave. is restored, traffic control measures will be reduced to open up the road.
